

Tactex Asset Management Launches the Teldar US Long Short Equity Fund

**Tactex Asset Management, a Canadian investment management firm, has launched the Teldar Long Short US Equity Fund, a quantitative multi-strategy fund that aims to provide absolute returns with low correlation to equity markets.**

Montreal, Quebec (October 20th, 2016) – Tactex Asset Management Inc. (“Tactex”) announces the launch of the Teldar US Long Short Equity Fund (the “Fund”). The Fund focuses on strategies that use quantitative models to capture abnormal returns while hedging market exposure to minimize portfolio volatility.

The Fund trades mid to large-cap U.S. equities and ETFs and is diversified across most sectors, targeting returns of 15-20% with low correlation to equity markets. The Fund is available to qualifying investors.

“Our team brings an exceptional track record managing long short portfolios. The Fund uses a unique set of quantitative strategies focused on predicting the actions of market participants around key events” says Jeremy Lin, Portfolio Manager of the Fund. “By marrying this model with a hedged approach, our fund has the ability to capture returns under all market conditions.”

Liam Cheung, CEO of Tactex Asset Management, commented: “We are excited to have Teldar join our family of funds. With so many of the most successful long short strategies in the market no longer accepting new investment, Teldar is well positioned to cater to the growing demand for this asset class.”

#### **Tactex Asset Management Inc.**
